Dear Google Play Team,

Thank you for your response and for reviewing our appeal.

However, we respectfully request further clarification regarding the termination of our Google Play Developer account (ProjectDev2k25). We understand that actions have been taken under Sections 8.3 and 10.3 of the Developer Distribution Agreement due to what has been described as a pattern of high risk or abuse.

We would like to emphasize that our applications are focused on educational content, and we have never intended to violate any policies or game the system. We did not receive any prior warnings, suspension notices, or requests for clarification regarding specific violations. Additionally, we were not informed of any harmful content in our apps during the standard review or testing process, which we understand typically takes 15–30 days.

We respectfully request:

1. A more detailed explanation of the specific policy violations or harmful content that led to this action.
2. Clarification on how the determination of high risk or abuse was made.
3. If possible, an opportunity to rectify any issues to demonstrate our commitment to compliance.

As developers, transparency is crucial for us to understand and address any unintentional issues.

We sincerely hope you will reconsider our request and provide more detailed feedback regarding the termination decision.

Thank you for your time and understanding.

Kind regards,
Team ProjectDev2k25
